1 System overview

The Jet Ranger panel is driven by **one PC** over Ethernet. This paragraph checks *italic*, **bold**, and `inline code` such as `D,PITCH:4.5,BANK:-12.0`.

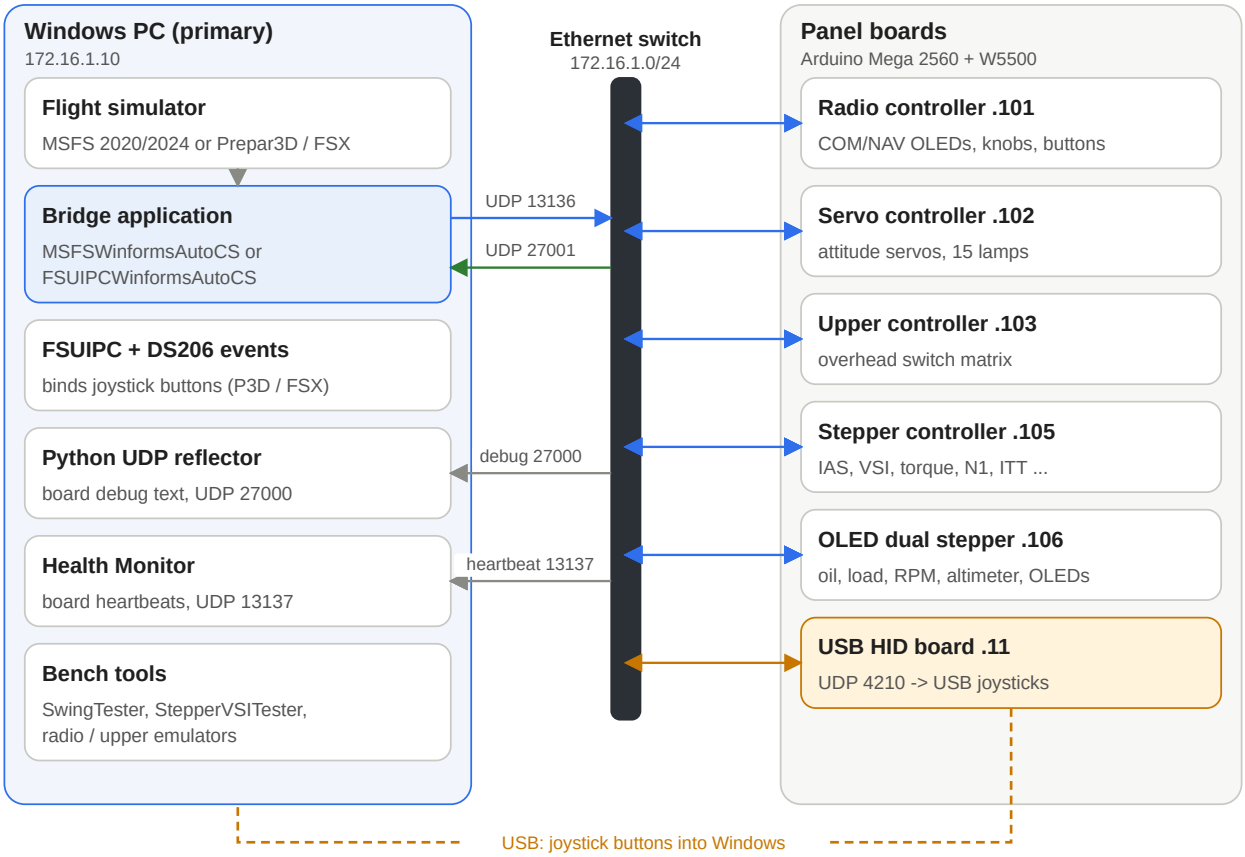

Figure 1 — The whole system on one page

1.1 Boards and addresses

Board	IP	Role
Radio controller	172.16.1.101	COM/NAV displays, knobs, buttons
Servo controller	172.16.1.102	attitude servos, lamps
Stepper controller	172.16.1.105	seven gauges

1.1.1 Rules

- Gauges are powered from the main bus at 20 V or more.
- The Radio uses the avionics bus at 24 V or more:
  - if the avionics bus reads 0 the main bus is used
  - otherwise it uses the avionics bus
- Everything else follows.
  1. First step.
  2. Second step with `code`.
  3. Third step.

> **Note:** callouts are used for cautions and tips.

```
D,PITCH:4.5,BANK:-12.0,EOUT:0
C,RESET:1
```
